Surface Session

The [Surface Pro 3](#) is a revolutionary device that can replace your laptop. Sporting a larger 12" screen, it is the thinnest device ever made to run an Intel Core chipset. With breakthrough innovations in the pen, kickstand and keyboard, no other device comes close to what the Surface Pro 3 can do. Customers like Coca-Cola, BMW and LVMH have already signed up to purchase Surface Pro 3s for their companies.

Join this session to learn more about what makes the Surface Pro 3 unique and see how it fits into Microsoft's overall vision for enterprise mobility. [This is also your exclusive opportunity to get your hands on the Surface Pro 3 before it becomes available to the public!](#)

Windows Session

At Microsoft we are staying agile and responsive to customer feedback and continue to make improvements to Windows. Windows 8 was released in October 2012 with a new modern UI optimized for touch. One year later Windows 8.1 was released with UI and MDM enhancements. And now Windows 8.1 Update has made the UI more friendly to mouse and keyboard users.

In this session we will provide a brief overview of Windows 8.1 Update and then dive into a deep discussion of what our customers have asked for in the next version of Windows. Join this interactive session to get a glimpse of our key priority areas and help us shape the future of Windows.

Windows Phone Session

2013 PC Magazine readers gave Nokia Lumia phones with Windows Phone 8 [the highest ratings for every business end-user satisfaction measure](#). Windows Phone 8.1 is packed with even more end-user delighters – the Cortana personal digital assistant, Word Flow (which enables one of the fastest keyboards in the world), Action Center for quicker notifications, better Skype integration and more.

In this session, we will focus on how we're also making Windows Phone 8.1 easier for businesses and IT professionals. Join this session to see expert demos and get details on features like customizable MDM enrollment, new MDM policies, LOB application & certificate management, S/MIME and VPN.
